MATERIAL SAFETY DATA SHEET

Trade Name: Johnsens 134a Refrigerant

 MSDS NO.
 6312

 Revision Date:
 07/08/2003

 Date Printed
 12/05/2003

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Trade Name: Johnsens 134a Refrigerant

Chemical Family: Refrigerant Gas

Synonyms: None

Emergency Telephone (24 hr.): CHEMTREC 1-800-424-9300

Supplier: Technical Chemical Company, P.O. Box 139, Cleburne, Texas 76033

2. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredient/CAS No. wt. % **OSHA PEL OSHA PEL ACGIH TLV ACGIH TLW TWA Ceiling Limits TWA** STEL 1,1,1,2-Tetrafluoroethane 100 Not Known Not Known Not Known Not Known 811-97-2 (Recommended <1000 ppm TWA)

Contains no other ingredients in concentrations >.1% that are now known to be hazardous as defined by OSHA.

3. HAZARDS IDENTIFICATION

Emergency Overview: Content under pressure. "Frostbite-like" effects may occur if the liquid or escaping vapors contact the eyes or skin. May

decompose on contact with flames or extremely hot metal surfaces to produce toxic and corrosive products. Gross inhalation overexposure may cause heart irregularities, unconsciousness or death. Vapor reduces oxygen available for breathing and is heavier than air. Workers with heart disease or compromised heart function should limit exposure to this

material. Keep away from heat, sparks and flame.

HMIS Classification: NFPA Rating:Health: 1 Flammability: 0 Physical Hazard: 2
Health: 1 Flammability: 0 Reactivity: 1

4. FIRST AID MEASURES

Eye Contact: In case of contact, or suspected contact, immediately flush eyes with plenty of water for at least 15 minutes and get

medical attention immediately after flushing.

Ingestion: Not applicable - product is a gas at ambient temperatures.

Inhalation: If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult

give oxygen. Get medical attention. Do not give adrenaline, epinephrin or similar drugs following exposure to this product.

For exposure to liquid, immediately warm frostbite area with warm water (not to exceed 105'f). In case of massive

exposure, remove clothing while showering with warm water. Get medical attention.

5. FIRE FIGHTING MEASURES

Flammable Properties

Skin Contact:

Flammable Limits in Air - Upper (%):

Autoignition Temperature °F(°C):

NA - Gas

Not Applicable

Not Applicable

743 C

Extinguishing Media: Use water spray to keep containers cool that are exposed to heat or flames. Use extinguishing media

appropriate for surrounding fire.

Protection Of Fire-Fighters:

Special Fire-Fighting Procedures: Warning!! Contents under pressure. Container may rupture under fire conditions. Decomposition

may occur. Wear approved positive-pressure self-contained breathing apparatus and protective

clothing.

Hazardous Combustion Products: May decompose on contact with flames or extremely hot metal surfaces to produce toxic and

corrosive products. Liquid and gas under pressure, overheating or overpressurizing may cause gas release and/or violent cylinder bursting. Container may explode if heated due to resulting pressure rise. Some mixtures of HFCDs and/or HFCs, and air or oxygen may be combustible if pressurized

Trade Name: Johnsens 134a Refrigerant MSDS NO. 6312

and exposed to extreme heat or flame.

Aerosol Comments: NFPA Level 1 Aerosol

ACCIDENTAL RELEASE MEASURES

Personal Precautions: Wear appropriate protective clothing and equipment to prevent skin and eye contact. Avoid breathing gas. When

airborne exposure limits are exceeded use NIOSH approved respiratory protection equipment appropriate to the

material and/or its components.

Spill Procedures: Wear protective equipment specified. Avoid all sources of ignition; heat, sparks and open flames. Use Halogen leak

detector or other suitable meanss to locate leaks or check atmosphere. Keep upwind. Evacuate enclosed spaces and disperse gas with floor-level forced-air ventilation. Exhaust vapors outdoors. Do not smoke or operate internal

combustoin engines

Increase area ventilation. Do not puncture or incinerate container. Contents under pressure.

Environmental Precautions: Do not allow entry to the atmosphere. Recover, reclaim or recycle when practical.

HANDLING AND STORAGE

Handling and Storage:

CAUTION: COMPRESSED GAS. Do not puncutre, incinerate or store above 120 F. Do not store in passenger compartment of automobile. Avoid breathing vapors, if exposed to high vapor concentration, leave area at once. Avoid contact with skin and eyes.

Should not be mixed with air for leak testing or used for any other purpose above atmospheric pressure. Use only in a well

ventilated area. Do not reuse this container. Keep away from heat and open flame. Protect from light and heat

EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Local exhaust ventilation as necessary to maintain exposures to within applicable limits. Showers. Eyewash

stations

Chemical goggles; also wear a face shield if splashing hazard exists. Skin Protection: Avoid skin contact. Wear protective clothing and gloves.

Respiratory Protection: An approved respirator (i.e. NIOSH, etc.) should be worn when exposures are expected to exceed the

applicable limits. Use in a well ventilated area

PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear, colorless liquified gas.

MILD ETHER LIKE Odor: pH Value: Not Determined

Vapor Pressure: .665 MPa (6.66 bar) (25C) Vapor Density (Air=1): 3.25

-26.4 C Melting/Freezing Point: **Boiling Point (°F):** -160 C (Freezing Point) .9 g/l @ 25 C. Solubility in Water: Bulk Density at 20°C: 1.21 @ 25 C (g/cm3) Molecular Weight: **Evaporation Rate:** 102.03 Not Determined 1.21 @ 4 C. Viscosity: Not determined Specific Gravity (H20=1):

Decomposition Temperature: VOC Content(%): >370 C Not determined.

> 10. STABILITY AND REACTIVITY

Chemical Stability: Stable under normal temperatures and pressures.

Conditions to Avoid: Do not expose to heat or store at temperatures above 120 F. Keep away from heat, sparks and flame. Materials to Avoid:

Avoid contact with alkali or alkaline earth metals. Avoid finely powdered metals such as aluminum,

magnesium or zinc. Strong oxidizers.

Hazardous Decomposition Products: Thermal decompositoin products include hydrogen fluoride, hydrogen chloride, carbon monoxide, carbon

dioxide and chlorine.

Hazardous Polymerization: WILL NOT OCCUR
